

## GENERICALLY AVAILABLE DRUGS

The Doctors HealthCare Plan's Pharmacy and Therapeutics Committee recently approved new generic drugs to be added to the formulary. Use of these generic alternatives provides cost savings for the member and helps to avoid reaching the Coverage Gap as quickly as with other formulary drugs. The BRAND equivalents have been removed from the formulary.

All Generic Drugs contain the same active ingredient; have the same strength; use the same dosage form (tablet, capsule, or liquid); and use the same route of administration (oral, topical, or injectable) as those of the brand name.

You may access a list of our **Formulary** drugs on our website [www.doctorshcp.com](http://www.doctorshcp.com), under "Plans and Services" and "2020 Prescription Drug Coverage."
